

US Dollar Short Duration Bond Fund

A sub-fund of BlackRock Global Funds

Class A2 USD

ISIN: LU0154237225

Management Company: BlackRock (Luxembourg) S.A.

Objectives and Investment Policy

- ▶ The Fund aims to maximise the return on your investment through a combination of capital growth and income on the Fund's assets.
- ▶ The Fund invests at least 80% of its total assets in fixed income (FI) securities. These include bonds and money market instruments (i.e. debt securities with short term maturities).
- ▶ The FI securities may be issued by the United States (US) government and its agencies, non-US, governments and government agencies, and companies and supranationals (e.g. the International Bank for Reconstruction and Development) domiciled inside or outside of the US.
- ▶ At least 80% of the Fund's total assets will be investment grade (i.e. meet a specified level of credit worthiness) at the time of purchase. The remainder may include investments with a relatively low credit rating or which are unrated.
- ▶ At least 70% of the Fund's total assets will be invested in securities that are denominated in US dollars with a duration of less than five years. Duration is a measure of the average time it takes the Fund to get its return (both capital and income) on the investments it holds. The average duration (which is duration adjusted for the proportion in which the Fund holds each investment) is not more than three years.
- ▶ The investment adviser (IA) may use financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) for investment purposes in order to achieve the investment objective of the Fund, and/or to reduce risk within the Fund's portfolio, reduce investment costs and generate additional income. The Fund may, via FDIs, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).
- ▶ The IA has discretion to select the Fund's investments and in doing so may take into consideration the BoA ML 1-3 Year U.S. Government/Corporate Index.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your shares will be non-distributing (i.e. dividend income will be included in their value).
- ▶ Your shares will be denominated in US Dollar, the Fund's base currency.
- ▶ You can buy and sell your shares daily. The minimum initial investment for this share class is US\$5,000 or other currency equivalent.

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated three due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
 - Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 May 2019. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
