

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Strategic Credit

a sub-fund of Schroder International Selection Fund SICAV

Class A Accumulation EUR Hedged (LU1046235732)

This fund is managed by Schroder Investment Management (Europe) S.A., which is a member of the Schroders Group.

Objectives and Investment Policy

Objectives

The fund aims to provide capital growth and income by investing in bonds issued by companies in Europe.

Investment Policy

The fund invests at least two-thirds of its assets in bonds issued by governments, government agencies, supranationals and companies in Europe.

The fund may invest up to 100% of its assets in securities with a sub-investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies). The fund may also seek up to 25% exposure to convertible bonds and bonds with warrants. The exposure to convertible bonds includes up to 10% in contingent convertible bonds.

The fund may also invest in derivatives to create long and short exposure to the underlying assets of these derivatives.

The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently. The fund may also hold cash.

Benchmark

This share class is not managed with reference to a financial index.

Dealing Frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution Policy

This share class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the share class.

Risk and Reward Profile

The risk and reward indicator

The risk category is based upon the fund's risk target and there is no guarantee that the fund will achieve it.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it seeks to provide rewards whilst limiting price volatility.

Risk factors

The following risks may affect fund performance.

ABS and MBS risk: Mortgage or asset-backed securities may not receive in full the amounts owed to them by underlying borrowers.

Capital risk / contingent convertible bonds: The fund may be significantly invested in contingent convertible bonds. If the financial strength of a bond's issuer (typically a bank or an insurance firm) falls in a prescribed way the bond may suffer substantial or total losses of capital.

Capital risk / negative yields: When interest rates are very low or negative, the fund's yield may be zero or negative, and you may not get back all of your investment.

Counterparty risk: The counterparty to a derivative or other contractual agreement or synthetic financial product could become unable to honour its commitments to the fund, potentially creating a partial or total loss for the fund.

Counterparty risk / money market & deposit: A failure of a deposit institution or an issuer of a money market instrument could create losses.

Credit risk: A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.

Currency risk: The fund can be exposed to different currencies. Changes in foreign exchange rates could create losses.

Currency risk / hedged share class: Changes in exchange rates will affect the returns on your investment. The aim of this euro hedged share class is to provide you with the performance returns of the fund's investments by reducing the effects of exchange rate fluctuations between euro and the fund's base currency British pound.

Derivatives risk: A derivative may not perform as expected, and may create losses greater than the cost of the derivative.

High yield bond risk: High yield bonds (normally lower rated or unrated) generally carry greater market, credit and liquidity risk.

Interest rate risk: A rise in interest rates generally causes bond prices to fall.

Leverage risk: The fund uses derivatives for leverage, which makes it more sensitive to certain market or interest rate movements and may cause above-average volatility and risk of loss.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Operational risk: Failures at service providers could lead to disruptions of fund operations or losses.

Charges

One-off charges taken before or after you invest	
Entry charge	3.00%
Exit charge	None
This is the maximum that might be taken out of your money before it is invested.	
Charges taken from the fund over a year	
Ongoing Charge	1.33%
Charges taken from the fund under certain specific conditions	
Performance fee:	None

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure is based on the last year's expenses for the year ending December 2018 and may vary from year to year.

You can find more information about the charges in Section 3 of the fund's prospectus.

Past Performance

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in euro after the ongoing charges and the portfolio transaction costs have been paid. Entry charges are excluded from calculations of past performance.

The fund was launched on 12 March 2014.

1 Performance up to 12 March 2014 predates the launch of this share class and has been simulated using the history of Cazenove Strategic Debt, which contributed all of its assets and liabilities to the fund Schroder International Selection Fund Strategic Credit on 12 March 2014.

Practical Information

Depository: J. P. Morgan Bank Luxembourg S.A.
